Electric Combination Radiator Systems

Quality solutions for the ultimate heating experience

The LHZ Combination Electric Radiators have been designed using the latest technology to create an elegant solution for all hard to heat situations. They can be installed in almost any location due to the flexibility of the product.

The range has been developed to provide an adaptable solution for electric heating in Domestic properties, Conservatories, Holiday homes, Offices and any other central heating situation.

Our unique patented 'Magmatic' heating tablets provide the source for the radiator. Whilst the radiator is classed as a 100% efficient Direct Acting appliance, the heating tablets provide partial storage to prolong your heating comfort and to reduce running costs. The radiator has a robust body which incorporates a spot welded high fin surface area to ensure that there are no expansion or contraction noises during the heating cycle. The high fin design boasts 6 times the normal radiator surface area to provide a balance of Convection and Radiant heat for your added comfort.

The radiators can be simply plugged in to a standard socket or hard wired to an existing spur connection. The range has the flexibility of being wall mounted or free standing on castors or feet.

For added versatility we can supply conservatory radiators which are also ideal for use below windows with low sills.

All LHZ wall mounted radiators are supplied with electronic 24/7 programmable thermostats, compliant with LOT20 ERP regulations. Different manual thermostats are available when used on mobile radiators with stands or castors.

All LHZ radiators are manufactured in Germany to the highest safety and quality standards.

Each radiator is CE Marked and ENEC Marked and carries all the necessary European and other countries Approvals.

For countries within the EU, all LHZ wall mounted radiator are fully checked and tested prior to leaving the factory and are packed fully assembled complete with wall

hanging brackets and full Quality guaranteed Certification.

We hope that you find the superior products within this brochure of interest and we look forward to being of assistance to you in the near future.

LOT20 Compliant

Setting the standard in electric heating

2kW/2.4kW

Also available with Eco-Receiver.

Standard size electric combination radiators

1kW/1.2kW

500w/600w

The LHZ Electric Combination Radiators have been accepted as a practical modern solution to outdated, inefficient electric storage heaters. In many countries they are cheaper to run than oil fired heating systems and are now comparable with natural gas.

Lucht LHZ application for all smart phones now available.

Their success is due largely to the following features and benefits:

- No boiler, plumbing or pipework required
- Ease of Installation
- Manual, radio frequency or digitally integrated thermostat
- Safe, clean and easy to operate
- Fully controllable by either manual or digitally controlled (TDI) thermostats.
- Slimline Radiators are 70mm deep
- Various outputs and sizes are available from 500w - 3kW
- No maintenance required 100% efficient
- Supplied with wall fixing brackets
- Castors, feet stands or radiator supports can be ordered as optional extras
- Radiators come fully assembled with appropriate plugs and 1.5m of cable
- All radiators are powder coated in a white high quality enameled finish

As our products are of such superior quality we are proud to offer a **15 year warranty** on our radiators and a **2 year warranty** on the electronics across our full range of LHZ Electric Combination Radiators.

2.8kW/3kW

Close your eyes and dream in total comfort

No carbon monoxide risk and with a constant comfortable background temperature, you are assured of a warm and pleasant nights sleep.

1.5kW/1.8kW

LHZ standard range of radiators

All of the LHZ "Standard" sized Combination Radiators are 63cm high and only 7cm deep" (please refer to sizing chart on page 23).

All Radiators are supplied with wall mounting brackets as standard. Radiator supports, feet or castors can be supplied as optional extras.

Tall reputation with high
performance - whatever your space

(8)

1.8kW

Tall radiators are ideal for studies, living rooms as well as kitchens and bathrooms where space is at a premium. Towel rails can also be fitted.

1.2kW

1.6kW

Enjoy the outside inside with Conservatory radiators

To compliment your existing heating system LHZ have produced a selection of low profile electric radiators, all 340mm high. Ideal for use in conservatories, sunrooms and rooms with low window sills, all LHZ radiators are supplied with wall mounting brackets.

With the option of floor standing or castors you have the ability to place your radiator anywhere within your conservatory.

This practical range can be controlled by Manual, Radio Frequency or Integrated Digital Thermostats.

2kW

Make a splash with bathroom radiators

All LHZ Bathroom Radiators, up to an output of 1.5kW, are **IPX4 rated** and therefore tested and approved for use in all bathroom situations.

From standard radiators to tall radiators with towel hanging rails and bathroom radiators with a choice of chrome or white towel rails.

Please consult a qualified electrician before installing an IPX rated radiator in any bathroom or wet room location.

The LHZ engineering behind the quality

LHZ Combination Radiators heat the whole room evenly due to their high fin design.

This high fin design provides six times of surface area compared to other heaters

the same size, while helping warm air to circulate throughout the room by convection which in turn eliminates costly hot spots at ceiling height. As a result you will also experience enhanced heat at floor level and cosier feet.

Our unique combination radiators are designed to store the heat directly into the Magmatic Heat-Retention Tablets, without any loss of energy.

The metal ribs on the radiator form a six times greater surface area than a normal radiator. As a result of this, approximately 50% radiant heat as well as 50% convected heat is created, to give a much more constant temperature throughout the room, from floor to ceiling.

LHZ Radiators are unique due to the metal ribs being individually spot welded which prevents any noise during the heating up and cooling down cycle.

When the LHZ Radiators have achieved their required temperature the thermostat will cut the power to the Radiator. The Radiator will continue to provide heat, (that has been stored in the Magmatic tablets), for up to 45 minutes with no further use of electricity. The Radiators will use approximately 20–30 minutes of electricity per hour, depending upon on the building fabric and outside temperature.

The heating conductors are produced from high quality chrome-nickel steel (resistant to scaling up to 1100 °C) which are moulded into the Magmatic tablet, reducing the risk of corrosion.

The contacts inside the radiators are protected with heat shrinkable insulated sleeves to ensure optimum safety. Multiple thermocouples within each radiator provide overheat protection for additional safety.

← Optimum radiant heat created by outer High Fin Surface area

Inside - **Magmatic®** heat retention tablets

Mobile Electric Radiators

The LHZ Mobile Combination Electric Radiators can be supplied with a Manual Electronic Thermostat Controller located on the side of the Radiator for complete Temperature Control. Each Radiator is supplied with either Radiator Feet or Castors which enables you to heat any Room within your Property.

We offer a selection of outputs from 500 watts to 3000 watts in Standard height models. The Conservatory Range has a choice of 4 models from 500 watts and 2000 watts which are only 340mm in height.

All Radiators are supplied with a 1.5metre Cable.

Integral Control options

TDI 24 hour Digital Programmable Thermostat

Programming Mode:

The radiator can be programmed 24 hours/7 days at required temperatures.

Economy Temp:

The Economy setting default is 3.5 deg lower than the comfort setting. The Economy setting can be set up to 10°C lower than the comfort temperature.

Timer/Boost Mode:

This boost facility can be used to over-ride the programming mode. Temperature can be set between 5°C and 30°C for 30 mins to 72 hours.

Heating Demand Mode:

The ON icon displayed indicates that the radiator is in heating demand mode.

Frost Protection:

Frost protection temperature can be set between 5°C and 15°C.

Other features

- Keypad locking function
- Holiday Mode – the radiator can be set to "OFF" for the period of your holiday
- Backlight timeout setting – the timeout of the backlight can be set between 0-225 seconds

For full operating instructions refer our to website.

(Please note that TDI Models provide the luxury of Time & Temperature control which makes them ideal as Stand Alone Heaters)

TEI1 (E4) Manual Electronic Thermostat

For mobile radiators available in EU Countries

Thermostat features:

- On/Off mode
- Green light on shows power is going into the Thermostat
- Green AND Red lights on, means that power is going both into the Thermostat AND into the Radiator Elements/ Magmatic Tablets

Radio Frequency Control options

TRF wireless receiver

T Pod - eco thermostat

- 24/7 controllable digital radio frequency thermostat
- Can control up to 9 Radiators in one zone at the same time
- Can be used in conjunction with Eco Control See page 21

LHZ Wireless Control Radiators

The LHZ Combination Radiators Wireless Control option uses an RF Wireless thermostat that provides:

- Wireless Control
- 24/7 controllable digital radio Timer and Thermostat
- Can control up to 9 Radiators in one zone at the same time

The LHZ Wireless Control Radiator has a surface mounted T POD receiver on the side of the Radiator that works in conjunction with a separate T POD thermostat.

This T POD thermostat provides manual or 24/7 control over your radiator and also allows you to set Frost, Comfort and Economy setting temperatures.

T POD controller must be purchased separately.

2kW/2.4kW

LOT20 Compliant

Demand Side Management Electric Heating

LHZ's unique **DSM** Electric Combination Radiators have **In-Built Wi-Fi** capability that can be activated using the optional **DSM** Gateway. They are the first German Electric Radiators of their type that can be controlled via a bespoke APP Control System. This easy to install system is suitable as a complete central heating system or stand-alone Radiators. They can be individually controlled using the Digital Controller located on the side of the Radiator or alternatively using the bespoke APP.

- Control your heating anytime and anywhere
- Fully controllable for both Time and Temperature
- Energy saving APP Control
- Limit electricity consumption to avoid exceeding maximum power available
- Monitor your electricity consumption
- Open window sensor saving energy and money
- Use individually or as a fully integrated central heating system
- Portable (on castors or feet) or fixed (wall-mounted)
- 500w-2400w output
- Patented heating tablets continue to radiate heat for up to 45 minutes offering increased comfort
- High fin design provides up to six times the surface area of a conventional radiator
- Maintenance free and 100% Energy Efficient

Home Page Menu

Displays the heating status, temperature and operational functions of your system. You can select how you want to program your Heaters 24/7 however you have the facility to make changes to your heating requirements anytime, anywhere.

Power & Temperature Statistics Menu

The Smart system enables you to monitor the consumed power and temperatures at any time.

Consumption Limiter Menu

All homes have a maximum electrical power capacity. In order to stay within the limits of the capacity the Smart system has an inbuilt electricity consumption monitor / limiter. Our Smart Kit has an optional 100amp Power Meter Clamp.

Individual Heater Devices Menu

The Smart Wi-Fi system allows you to add, delete and prioritise Heaters at any time to provide you with full system control.

15 Year Guarantee

Simply connect to the Internet using a Smartphone, Tablet or PC and you will be able to open your LHZ Smart APP to control your heating 24/7. Our APP is compatible with both Apple and Android products.

DSM Smart Wi-Fi APPs

To convert your Smart Wi-Fi ready Radiator to an intelligent appliance that can be controlled anywhere, anytime you can purchase the LHZ DSM Smart Wi-Fi kit which includes:

- Smart Gateway
- Power Meter Clamp (optional)

Living Room

Study

Conservatory

Bedroom

LHZ Solar PV Ready Electric Radiators

Your Solar PV system is designed to generate Electricity and Income for your property however you could lose up to 70% of your available generated power if you're not using your appliances with the power generated, as the solar energy will be exported back to the grid.

LHZ offer a practical solution with our Solar PV Ready Electric Radiators which can be used as a secondary heat source when using the energy generated by your Solar PV system combined with our Solar Controller unit. This unique range boasts the same benefits offered by our Standard Electric Combination Radiators, and are also popular as a secondary pre-heat source for those hard to heat and commonly used living areas.

- Suitable for new and retrofit Installations
- Heating powered with energy generated by your Solar PV system
- Each Radiator can be individually controlled by a Manual Thermostat
- Send your generated Solar PV Energy to rooms that require the most Heat
- No CO₂ Emissions
- Sustainable for the Future
- Warranty – Main Body 15 Years/Electronics 2 Years
